

Making Words – Worksheet:

- 1) Give each student index cards – one for each letter that they will be using to make words.
- 2) Have your students write one letter on each of their cards (see below). For example, in Warm-Up Lesson 1, students are going to make words using the letters a, c, c, h, r and t. (c is there twice so students can make the last word - scratch)

- 3) Follow the directions for the additional warm-up lessons!
- 4) Each time that the students make a word, write the word they made on an index card. After they have made all the words, you will use those cards to do the sorting activity.
